# Model 300 feasibility enquiry - 419 Cecelia Rd, Victoria, BC

## SAVED EXAMPLE ONLY - not my property.

Please advise what is needed for an initial call.

## Project

I'm exploring aux box Model 300 at 419 Cecelia Rd, Victoria, BC. I would use it for Garden suite.

My spending preference is Prefer CAD 250,000 overall; still exploring.

## Preliminary concerns

The following matters remain unresolved before relying on this proposal.

The rectangle overlaps a mapped building outline (27.9 m²). Rooflines are not surveyed walls.

Could you advise whether relocation, rotation or another configuration is worth exploring? I will resolve the planning questions separately before relying on this position.

## Cost scope for discussion

Cost scope: Whole project. Priced-components subtotal: CAD 187,000 or more; upper amount unknown. Based on aux box published starting price (captured 2026-10-06, unreviewed; https://www.auxbox.ca/model-300). Unpriced or unresolved: Upgrades, Delivery and lift, Foundation and site work, Service connections, Professional work, Fees, Tax, Contingency. Installed total unavailable; please help establish the missing scope.

Builder/provider: For Model 300, which current configuration, currency and dated price apply, and what upgrades, delivery/lift and tax are included or excluded?

Builder/provider: Which access/crane, foundation and utility facts would let you or a local contractor scope installation, and who coordinates that work?

Builder/provider: Who will confirm professional-work, permit-fee and tax scope, including any applicable waiver or credit?

## Questions for aux box

For Model 300, can you confirm a matching quote and the foundation responsibilities?

1. Can you share current dimensioned plans with their date/version, overhangs, interior floor area, height measurement reference and foundation requirements?

2. Do you service this locality?

3. What is the current lead time, when does it start, and what decisions, permits and site preparation must be complete before booking or delivery?

## Planning questions to resolve separately

Intended use supplied: Garden suite. The planning comparisons use a garden-suite scenario; City or professional review must establish whether that scenario applies.

The property contact needs to confirm the main home, existing suites and waterfront context. City staff or a qualified local professional needs to check the applicable rules, legal measurement basis and any permit or title conditions. Please advise what product information you can provide to support that review.

## Site information

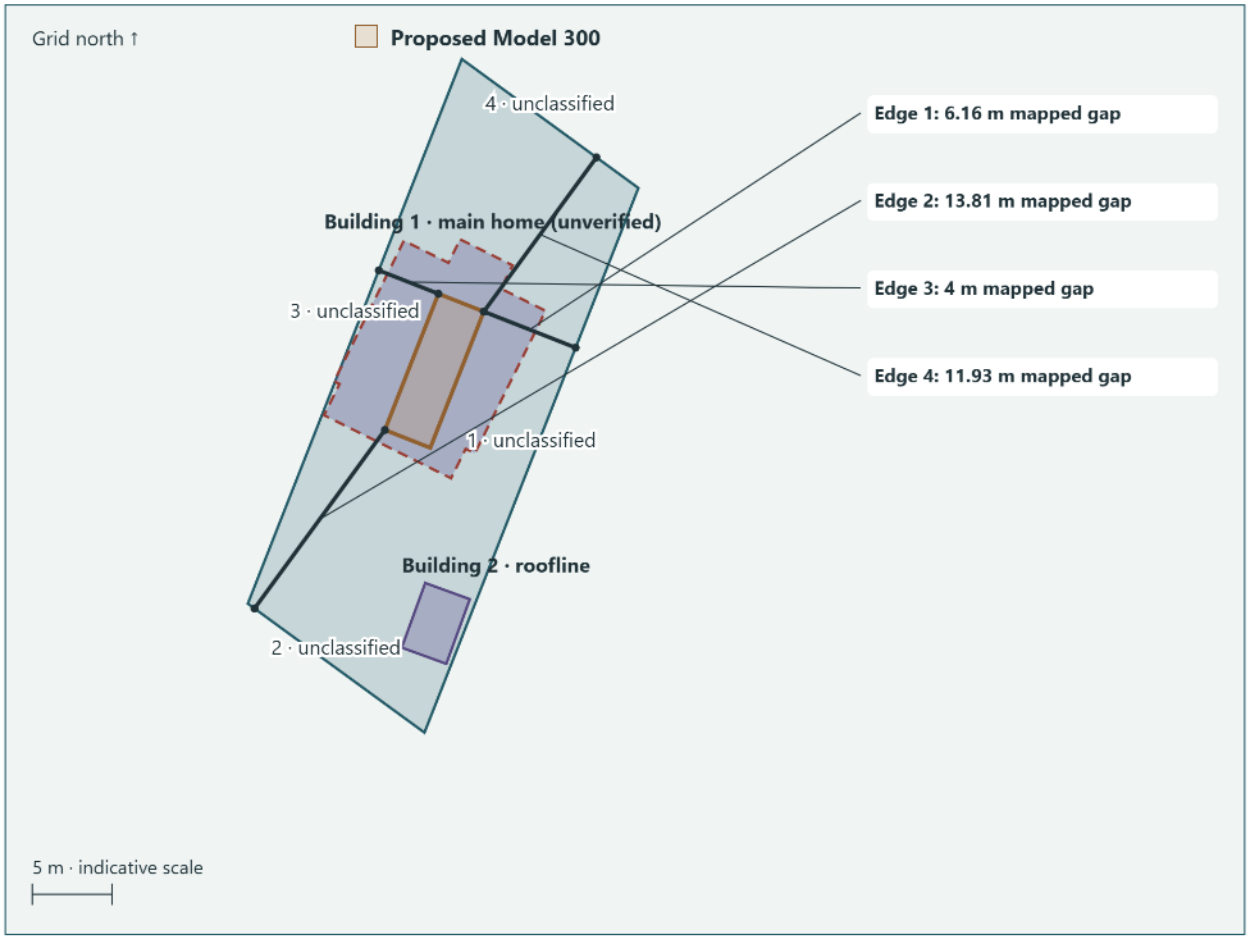

The preliminary rectangle is 3.05 m × 9.14 m using published nominal dimensions. It excludes unconfirmed overhangs and installation space.

Thank you.

## Approximate proposed placement

Not a survey or approved site plan · preliminary discussion only

**SAVED EXAMPLE ONLY — not the sender's property**

Teal: parcel / Purple: buildings / Copper: unit / Yellow dashed: estimated rear yard

Red: comparison concern / outside yard · Grey: street marks, not road widths. All gaps approximate.

Approximate mapped outlines and a nominal unit rectangle. This is a discussion sketch, not a survey or approved site plan.
